

General Information

C type is the CBE, dedicated to R744 (CO₂), and compatible with heat pump and refrigeration system. The model has three types, including 70/100/140 BAR. The compact design plus outstanding thermal transfer efficiency and low pressure drop characterize C series. C096 can sustain 100BAR and afford the pressure caused by R744 as thermal media. This capacity delights the COP value and results in "0" ODP to protect the environment where we live. C096 can work well with pre-cooler and pervasively in various kinds of residential heat pump.
