R096

General Information

R096 is the newly-developed BPHE dedicated to environment-friendly and high thermal transferring refrigerant such as R32,R410a, R134a. R051 uses innovative design on shape of plates. Its light weight and high pressure resistance significantly reduces carbon emission, and the efficiency rises 10% as well. R051 has perfect compatibility for working conditions, generating cooling and heating effects, especially evaporator and condenser.
